#### Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

#### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

## Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: www.rrt.net

Explain:

## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Availability of hearing aid capable handsets is mentioned in advertisements such as bill inserts, newsletters, ads, mailers and brochures. HAC information is also on our website and signage in our office.

## Methodology for Functionality Levels

We offer HAC-compatible handsets and devices in all major price categories, including low-cost ("C" level <\$100), moderate-cost ("B" level \$100-\$250), and high-end/feature-rich ("A" level >\$250). Costs generally correlate with the number of features, but, if through experience, Red River Telephone finds that a certain handset contains features that work well with hearing aids, such as volume control, it will be labeled accordingly with an "A" level for functionality. Red River Telephone's sales staff can assist existing and prospective customers looking for a HAC-compliant device/handset. HAC-compatible handsets and devices vary in their inherent "levels of functionality," but typically at least one (1) HAC-compliant handset/device with features and services typical of its price category can be found that meets each customer's price range.
